

## 3d sculpting

## models, models, models

cutting edge technology at Sunset Signs allows us to model virtually anything in 3D software, even from a simple line drawing or photo. our specialist machinery then creates a 3D version of the design. this is undoubtedly one of the most recent advances in signage manufacture.

Forbes Jewellers, Portadown and Lisburn

NGK - Spark Plug County Crest - Carved

## award winning crests

we excel in this area of expertise and were delighted to receive a COMMENDATION AWARD in the Craftsman' category at the UK Sign Industry Awards.

Markethill Primary School Crest

## just imagine

we can create imaginative bespoke designs that can be carved with the finest of detail. recreation & restoration of historic objects can also be undertaken.

## cad

☞ using computer aided design and modelling capabilities you can view a 360° model of your sign before production. this allows you to visualise how your finished sculpture will look.

Computer model of Northern Ireland Fire and Rescue, Armagh

Northern Ireland Fire and Rescue, Armagh - Machining In Progress...

## colour creation

☞ at sunset signs we believe in high quality paint that lasts as well as accurate colour reproduction. that's why we have invested in our own paint mixing system so that we can deliver that high quality finish. we can even mix pantone colours.

## finishing touches

☞ hand painted detail and hand gilded gold leaf offering over 20 years experience of traditional signwriting, mixing proven techniques with modern materials.

## machining

☞ signs & 3d crests can be machined from a vast array of materials including aluminium, brass, foam, pvc, acrylic, hdu [high density urethane] and wood.
